

In high rise building long travel time can be uncomfortable in hot and humid environment. Elevator air conditioning is most economical way to make elevator travel comfortable.

Elevator air conditioning is challenge due to moving nature of elevator cabin and confine space on car top. Beside biggest challenge is handling of condensate water.

Elevakool is answer for all

- It is zero water discharge
- Compact and light weight
- Model to meet need for every car top
- Low vibration and low noise
- Backed by expert to select, install and service across India

Model name up to 20 Passenger capacity

TK 18	TK 26	NK 25 Y/H	NK25Y/S	NK 25 Y/S2
				
TK 32	TK 35	NK 32 Y/H	NK32 Y/S	NK 32 Y/S2

Model Name above 20 Passenger capacity

Supply Include following accessories

Option accessories

Travelling cable / Non-metallic grill / ELCB / Isolation ducts
